ANNUAL STREET IMPROVEMENT PROJECT INCLUDES 17 MILES OF STREETS

Chino Hills, CA – The \$1.5 million 2017/2018 annual street improvement project in Chino Hills includes 17 miles of streets. The patch and repair work has been completed and the application of slurry will be underway on weekdays from Tuesday, July 10th through Tuesday, July 30th. All American Asphalt is required to distribute door hanger notices on affected streets at least 48 hours in advance of the slurry seal work. Residents will be required to move their vehicles to other streets and stay off the fresh slurry for several hours.

Slurry work starts on Rancho Hills Drive where one half of the street will be slurry sealed at a time. A flagging operation will direct traffic to share the remaining open lane causing minor delays. Unforeseen conditions may cause a change to the schedule. A complete schedule is available online at www.chinohills.org/StreetProject.

The bulk of the project will be completed west of Chino Hills Parkway on both sides of Grand Avenue including the Rancho Hills neighborhoods. The project area also includes streets in lower Los Serranos, Garden Court, and Buckingham north of Chino Hills Parkway. Striping work and pavement markings will begin starting the week of July 30th.

According to Public Works Director Nadeem Majaj, the City strives to invest \$1 million each year to maintain City streets. This project is funded by the Gas Tax, and Measure I, the half-cent sales tax approved by voters for transportation projects. For additional information please call (909) 364-2770.
