GREASE INTERCEPTOR WAIVER REQUEST

I, _____, operator of

 (Name of Proprietor)

_____, located at _____
 (Name of Business) (Street Address)

do hereby confirm that at no time shall any grease, fats, solids or any other type of material be discharged into the City of Chino Hills sewer collection system that impairs in any way the functional operation of the system. If at any time the operation of this facility results in non-compliance with this agreement, I do hereby consent to install, within sixty (60) days, a grease interceptor sized in accordance with the City's requirements (minimum 500 gal.)

As a condition of approval for this waiver I agree to install an accessible monitoring station for the purpose of sampling the wastewater discharged from this facility. Furthermore, I agree to install the underground drain, waste and vent system in such a manner so as to keep plumbing fixtures that could receive potential grease wastes separated from bathroom fixtures and other fixtures that typically do not. This separate parallel system shall be directed to a location outside the structure that is suitable for the installation of a future grease interceptor. These two separate waste systems shall be connected together outside the structure prior to being connected to the onsite sanitary sewer.

This waiver, if granted, is issued to the proprietor stated herein, and is non-transferable.
