

"Heritage tree" means any species of single- or multi-trunk tree having a cumulative diameter of forty-four (44) inches or greater at DBH, and of significant age, health and quality to be deemed valuable to the aesthetics of the community by a City-approved certified arborist. Excluded from the "Heritage Tree" designation are invasive trees as defined by the California Invasive Plant Council, and trees susceptible to breaking or falling such as the Eucalyptus Blue Gum and/or other tree species identified by a City-approved certified arborist.
